🪪 ABOUT

A passionate Full-stack Developer with a solid foundation in HTML, CSS, React, and JavaScript, along with hands-on experience in Node, Express, RESTful APIs, and TypeScript.

Bring a proactive, solution-oriented mindset, strong communication skills, and a sharp eye for detail. Always eager to learn and collaborate, I thrive in dynamic environments where clean, efficient code meets user-friendly design.

💼 EXPERIENCE

Nordic Waves Group
Full-stack Developer
08/2024 – present | Remote
· Developed API endpoints for front-end teams as a back-end service to calculate emissions.
· Ensure smooth integration between back-end (Node.js, TypeScript, MongoDB) and front-end (React) components.
· Collaboration with cross-functional teams to gather requirements and design scalable solutions.
· Working through GitHub and Git to provide constructive feedback on your peers' work and promote coding standards.

🎓 EDUCATION

Bachelor of Science (BS) |Electronics and Communication Engineering
Marmara University
Istanbul, Türkiye

📂 PROJECTS

YelpCamp ↗
Full-stack Camping Review App
· Full-stack web application, YelpCamp, a camping site search platform inspired by Yelp.
· Developed a full-stack camping search app, YelpCamp, to help users find and review campgrounds.
· Built features allowing users to add, edit, and review campgrounds, with secure user authentication and admin roles.
· Integrated an interactive map display for locations to enhance user experience.
· Used dynamic page rendering for engaging and responsive design.

E-Commerce App ↗
Full-stack E-commerce Webshop
· Full-stack E-commerce webshop with React.js and Next.js, featuring secure Stripe payments, custom product listings, and
cart functionality, all powered by Sanity CMS for dynamic content management.
· Built with React.js and Next.js for optimal performance and fast loading using server-side rendering and static generation.
· Created custom components for product listings and a dynamic cart to enhance user interaction.
· Integrated Stripe for secure and reliable payment processing.
· Used Sanity CMS for flexible content management.
